InfiniBand Trade Association Integrators' List

October 2019

IBTA InfiniBand
Integrators' List
October 2019

Manufacturer	Description	Model	Type	Speed	FW	SW
Mellanox	ConnectX®-3 Pro VPI, FDR IB (56Gb/s) and 40/56GbE Dual-port QSFP, PCIe3.0 x8	MCX354A-FCCT	HCA	FDR	2.42.5000	MLNX_OFED_LINUX 4.7-1.0.0.1
Mellanox	ConnectX®-4 VPI, EDR IB (100Gb/s) and 100GbE Dual-port QSFP28, PCIe3.0 x16	MCX456A-ECAT	HCA	EDR	12.26.1040	MLNX_OFED_LINUX 4.7-1.0.0.1
Mellanox	ConnectX®-5 VPI, EDR IB (100Gb/s) and 100GbE Dual-port QSFP28, PCIe4.0 x16	MCX556A-EDAT	HCA	EDR	16.26.1040	MLNX_OFED_LINUX 4.7-1.0.0.1
Mellanox	ConnectX®-6 VPI adapter card, HDR IB (200Gb/s) and 200GbE, dual-port QSFP56, Socket Direct 2x PCIe3.0 x16	MCX653106A-HCAT	HCA	HDR	20.26.1040	MLNX_OFED_LINUX 4.7-1.0.0.1
Mellanox	Switch-IB 2 based EDR InfiniBand 1U Switch, 36 QSFP28 ports, x86 dual core	MSB7800-ES2F	Switch	EDR	15.2000.1142	3.8.2032
Mellanox	Mellanox® Quantum(TM) HDR InfiniBand Switch, 40 QSFP56 ports, 2 Power Supplies (AC), x86 dual core	MQM8700-HS2F	Switch	HDR	27.2000.2046	3.8.2032
NetApp	Dual Controllers iSER EDR Target	E5700	iSER Target	EDR	8.52	11.50.2P1

Software	Versions	Diagnostic Software	
Operating System	Cent OS 7.7-1908	ibutils2	MLNX OFED 4.7-1.0.0.1
Mellanox OFED	MLNX OFED 4.7-1.0.0.1	Compliance Test Suite	v. 1.0.52
Open MPII	Open MPI 3.1.4		
Benchmark	Intel MPI Benchmarks	Benchmarks Performed	
Test Plan	Software Forge IBTA MOI Suite	PingPong	Gather
Duration	2-5 Minutes	PingPing	Gatherv
		Sendrecv	Scatter
Conditions for Passing Testing		Exchange	Scatterv
Link Width	Link width is @ expected width - i.e. 1x,4x, etc	Allreduce	Alltoall
Link Speed	Link speed is @ expected speed - e.g. 100 GbE	Reduce	Alltoallv
Errors	There must be no errors recorded during any test phases	Reduce_scatter	Bcast
MPI Test	The MPI Benchmark must run to completion	Allgather	Barrier
Compliance	Devices must pass all Compliance Tests	Allgatherv

October 2019 **EDR** Interoperability List

Hardware used to test Interoperability

Interop Legend

MCX556A-EDAT ↔ MSB7800-ES2F ↔ **Cable** ↔ MQM8700-HS2F ↔ MCX653106A-HCAT
MCX456A ↔ MSB7800-ES2F ↔ **Cable** ↔ MCX653106A-HCAT
MCX556A ↔ **Cable** ↔ MCX653106A-HCAT
MCX653106A-HCAT ↔ MSB7800-ES2F ↔ **Cable** ↔ MQM8700-HS2F ↔ MCX653106A-HCAT

Conditions for passing Interop

Link Width	Link width is @ expected width - i.e. 1x,4x, etc
Link Speed	Link speed is @ expected speed - i.e. FDR
Link Recovery	There must be no errors during the MPI Run
Port Receive Errors	There must be no errors during the MPI Run
Symbol Errors	There must be no errors during the MPI Run
Port xmit Discard	There must be no discards during the MPI Run
MPI Test	The MPI test must run to completion without error

Manufacturer	Description of Hardware	Model	Type	HW	FW	SW	Speed	Status
Mellanox	ConnectX®-3 VPI card, 4X QSFP 56Gb/s	MCX354A-FCCT	HCA		2.42.5000	4.7.1.0.0.1	FDR	Compliant
Mellanox	ConnectX-4 VPI adapter card, EDR IB (100Gb/s) and 100GbE, dual-port QSFP28	MCX456A-ECAT	HCA		12.26.1040	4.7.1.0.0.1	EDR	Compliant
Mellanox	ConnectX®-5 Ex VPI adapter card, EDR IB (100Gb/s) and 100GbE, dual-port QSFP28	MCX556A-EDAT	HCA		16.26.1040	4.7.1.0.0.1	EDR	Compliant
Mellanox	ConnectX®-6 VPI adapter card, HDR IB (200Gb/s) and 200GbE, dual-port QSFP56	MCX653106A-HCAT	HCA		20.26.1040	4.7.1.0.0.1	HDR	Compliant
Mellanox	SwitchX® EDR Switch, 36 QSFP ports. Managed	MSB7800-ES2F	Switch	AB	15.2000.1142	3.8.2032	EDR	Compliant

IBTA Integrators' List
October 2019 **HDR** Interoperability List

Hardware used to test Interoperability

Interop Legend
MCX653106A-HCAT ↔ **Cable** ↔ MQM8700-HS2F ↔ MCX653106A-HCAT

Conditions for passing Interop

Link Width	Link width is @ expected width - i.e. 1x,4x, etc
Link Speed	Link speed is @ expected speed - i.e. FDR
Link Recovery	There must be no errors during the MPI Run
Port Receive Errors	There must be no errors during the MPI Run
Symbol Errors	There must be no errors during the MPI Run
Port xmit Discard	There must be no discards during the MPI Run
MPI Test	The MPI test must run to completion without error

Manufacturer	Description of Hardware	Model	Type	HW	FW	SW	Speed	Status
Mellanox	ConnectX®-6 VPI adapter card, HDR IB (200Gb/s) and 200GbE, dual-port QSFP56	MCX653A-HCAT	HCA		20.26.1040	4.7.1.0.0.1	HDR	Compliant

InfiniBand Trade Association

Plugfest 36
Test Equipment
Providers

The **IBTA** wishes to thank **Anritsu, Keysight, Molex, Software Forge, Ace Unitech** and **Wilder Technologies** for providing the following test equipment and software for the IBTA Plugfests. All this equipment is provided free of charge for the benefit of the InfiniBand community and the IBTA Plugfests would not be possible without this equipment.

Anritsu - Signal Quality Analyzer MP1900A

The MP1900A Signal Quality Analyzer is an expandable modular NRZ and PAM4 BERT supporting wideband bit rates from 2.4Gb/s to 128Gb/s for versatile signal integrity analysis applications. Supports IBTA and IEEE rates such as HDR (PAM4 26.56Gbaud x4), EDR (NRZ 25.78Gb/s x4). Supports all 200G/400G PAM4 and NRZ rates defined by IBTA, IEEE, OIF-CEI, Fiber Channel standards.

MP1900A System Features:

- Pulse Pattern Generator supports output of high-quality / low jitter NRZ and PAM4 waveforms. Integrated emphasis and flexible pattern generation for PAM4 applications.
- Error Detector with high input sensitivity and integrated clock recovery. Includes signal analysis tools such as Bathtub, Jitter Decomposition, and Eye Contour. Integrated real-time PAM4 decoding for BER/SER and powerful jitter tolerance applications.
- Integrated Jitter Modulation for SJ/RJ/BUJ/SSC generation and supporting Jitter Tolerance tests.
- Integrated Noise injection to address standards-based stressed signal requirements. (CM, DM, White)

IBTA Application:

- Supports HDR, EDR, FDR, QDR Active Cable Time Domain Testing (ATD).
- Multi-channel PPG to create victim and aggressor traffic.
- Jitter Modulation Source to inject jitter onto the victim channel to create stressed conditions.
- Multi-Channel error detection for BER analysis during stressed receiver testing.

   https://www.anritsu.com/en-US/test-measurement/support/downloads/brochures-datasheets-and-catalogs/dwl18627

Anritsu - Signal Quality Analyzer MP1800A

The MP1800A Signal Quality Analyzer is an expandable plug-in modular BERT supporting wideband bit rates from 0.1 to 32.1 Gb/s for versatile signal integrity analysis applications, such as InfiniBand EDR (26G x 4), 100 GbE (25G x 4), OTU-4 (28G x 4), 32G DP-QPSK, CEI-28G and 32G FC.

MP1800A System Features:

- Pulse Pattern Generator (PPG) supports output of high-quality, low jitter, and high amplitude signals.
- Error Detector (ED) with high input sensitivity supporting signal analysis, such as Bathtub Jitter and Eye Diagram Measurements. 32G Clock Recovery.
- Error Detector Bathtub measurements for jitter (J2 & J9) measurements.
- Jitter Modulation for SJ/RJ/BUJ/SSC generation and supporting Jitter Tolerance tests.

IBTA Application:

- QDR, FDR and EDR Active Cable Time Domain Testing (ATD).
- Multi-channel PPG used to create victim and all aggressor traffic.
- Jitter Modulation Source is used to inject jitter onto the victim channel to create stressed conditions.
- Multi-Channel error detection for BER analysis of stressed receiver testing.

MP1800A Front View

Anritsu - MP1825B - 4Tap Emphasis

Combined use of the MP1800A and the MP1825B 4Tap Emphasis generates 2 and 3-tap pre-emphasis signals for high speed interconnects up to 32.1 Gb/s, such as InfiniBand EDR (26G x 4), CEI-28G and 32G FC, as well as 4-tap signals.

As a compact remote unit, the MP1825 4Tap Emphasis can be placed very close to the DUT, keeping cables short and preserving high signal quality. Precision signal integrity analysis is supported by pre-emphasis.   In addition, MP1825 supports highly accurate Jitter Tolerance measurements due to transparency of the clock and data paths through the unit.

IBTA Application:

- QDR, FDR and EDR Active Cable Time Domain Testing (ATD)
- Precise adjustment of victim input signal characteristics such as DDWPS and Eye Mask parameters

MP1825B Front View

Anritsu – MP2110A- BERTWave

The MP2110A BERTWave supports simultaneous 4 channel pattern generation and BER measurements with sampling scope eye pattern analysis for evaluating optical and electrical signals. Enhanced sampling scope measurements available with Jitter Analysis and PAM4 Analysis software.

IBTA Application:

- Aggressor traffic for HDR, EDR, FDR, QDR ATD Testing
- Simultaneous 4 channel BER measurements for EDR, FDR, QDR ATD Testing
- 40GHz BW Sampling Scope with Jitter Analysis and Precision Trigger
- Eye Mask functions for DUT measurements
- Jitter Decomposition (TJ, DJ, J2, J9, DDWPS) for DUT measurements

MP2110A Front View with External Monitor

Anritsu – MP2100B- BERTWave

The MP2100B BERTWave supports simultaneous BER measurements and eye pattern analysis for evaluating active optical devices. The Jitter Analysis Software provides accurate jitter analysis and decomposition.

IBTA Application:

- QDR / FDR Active Cable Time Domain Testing (ATD).
- 25GHz BW Sampling Scope
- Eye Mask functions for Victim Input calibration and DUT Output measurements
- Jitter Decomposition (TJ, DJ, J2, J9, DDWPS) for Victim Input Calibration / DUT Output measurements

Anritsu – MT1000A Network Master Pro

The MT1000A is an all-in-one portable tester with expandability and operability for speeds up to 100Gb/s. The compact, battery-powered and easy-to-use Anritsu MT1000A provides everything needed to install and maintain communication networks in a rugged, field portable package. This lightweight instrument simplifies the task of collecting and interpreting data with an easy-to-use GUI and clear summaries allowing users of any skill level to operate the instrument to its full potential. The MT1000A's installed MU100011A module provides the appropriate signal interfaces for testing performed at IBTA Plugfests.

IBTA Application:

- 4 Channel Pattern Generator provides required signal activity for DUTs measured on VNA Station.
- 4 Channel Pattern Generator can provide Aggressor traffic for EDR ATD Station.
- 4 Channel Error Detector can provide BER measurements for EDR ATD Station.
- *Wilder HCB used for interconnect between QSFP28 and SMA.*

Keysight - **Wide-Bandwidth Equivalent-Time (Sampling) Oscilloscope (DCA-X)**

The Keysight N1000A/86100D DCA-X family of oscilloscopes, together with the N1060A Precision Waveform Analyzer (aka "MegaModule") plug-in module, has been engineered to provide precision measurements on high-speed electrical communications systems and components:

- Fast and accurate jitter/eye/analysis of NRZ and PAM4 signals
- Bandwidth: 50 GHz / 85 GHz (95 GHz typ)
- Intrinsic random jitter (RJ): 50 fs rms (typ)
- Built-in clock recovery: 150 MBd to 64 GBd (continuous), with integrated EQ for "closed eye" analysis

The N1060A provides accurate jitter analysis, eye diagram, and waveform characterization on InfiniBand (HDR, EDR, FDR, QDR ATD Testing), Ethernet, OIF-CEI, and Fibre Channel applications to 64 GBd.

IBTA Application: FDR/EDR/HDR HCA and Switch physical layer testing, and EDR/HDR Active Cable Time Domain testing.

Keysight - Network Analyzers

1) **ENA used in FDR Cables testing**
   a) [E5071C]():   20 GHZ ENA Series Network Analyzer
   b) E5071C Data Sheet: http://literature.cdn.keysight.com/litweb/pdf/5989-5479EN.pdf
20 GHZ ENA Series Network Analyzer

2) **N5244A PNA-X Microwave Network Analyzer used in EDR Cables testing**
   a) [N5244A]().:   43.5 GHZ ENA Series Network Analyzer
   b) N5244A PNA-X Data Sheet: http://literature.cdn.keysight.com/litweb/pdf/N5245-90008.pdf
IBTA Application:
- FDR Device Physical Layer testing: SDDxx, SCCxx and SDCxx
- FDR and EDR Cable testing. ICN, ICMCN, SDDxx, SCCxx and SDCxx

3) 32 Port VNA used in FDR and EDR Cable testing since PF29

    a) M9375A: PXIe Vector Network Analyzer

    b) M9019A: M9019A PXIe Chassis

    c) PLTS: Physical Layer Test Suite – software to process s32p files
IBTA Application:

- FDR and EDR Cable testing. ICN, ICMCN, ILD, SDDxx, SCCxx and SDCxx

Molex – Module Compliance Boards (MCB)
Molex QDR QSFP Test Board
[0739313022](#) QDR QSFP Evaluation Board

Molex FDR & EDR zQSFP+ Test Board
[1111143022](#) zQSFP+ Evaluation Board

Molex QDR CXP Test Board
Part Number: 73931-3442

Please contact a Molex Representative via www.molex.com to purchase this board.

IBTA Applications:
- CXP & QSFP MCB
    - QDR TDR Cable Testing
- zQSFP+
    - QDR, FDR and EDR Active Cable Time Domain Testing (ATD)
    - FDR and EDR VNA testing

Software Forge – Compliance Test Suite (CTS)

The current version of CTS provides InfiniBand Protocol Layer testing. It is based on the Compliance and Interoperability Working Group InfiniBand Test Specification (Volume 3). This tool has replaced the old Agilent TCL test suite.
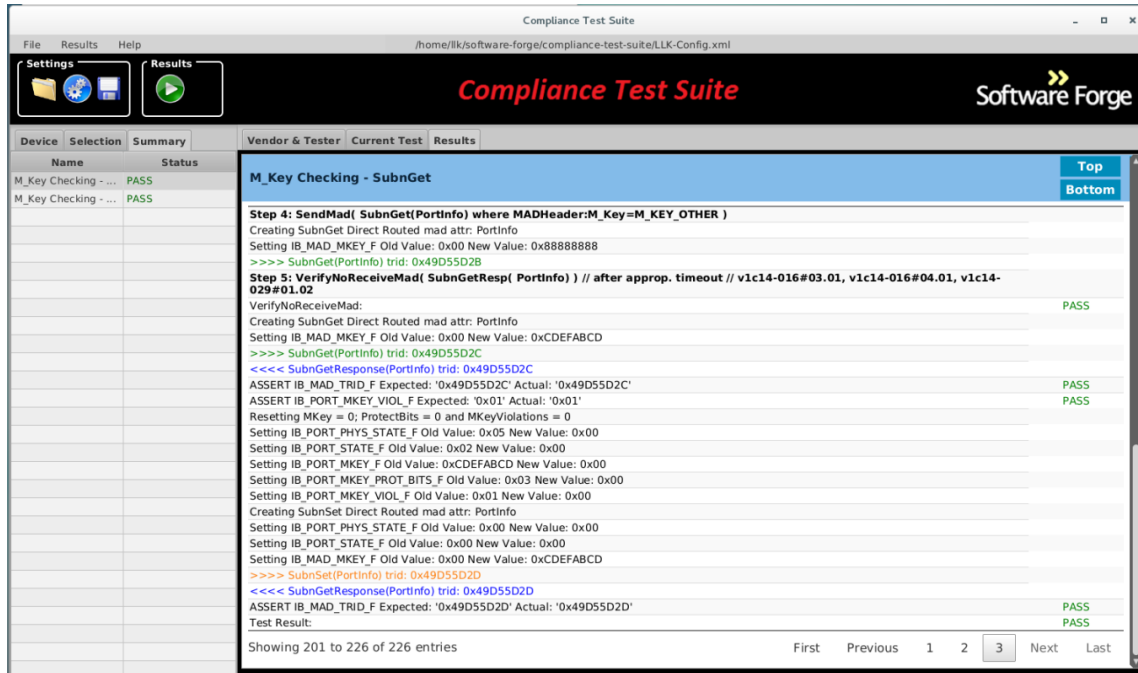

Software Forge – EEPROM Command Center (ECC)

The EEPROM Command Center is an application which enables the user to control and monitor the status of the QSFP memory maps. The user can write to writable fields of the QSFP memory map and easily export summaries of the results.
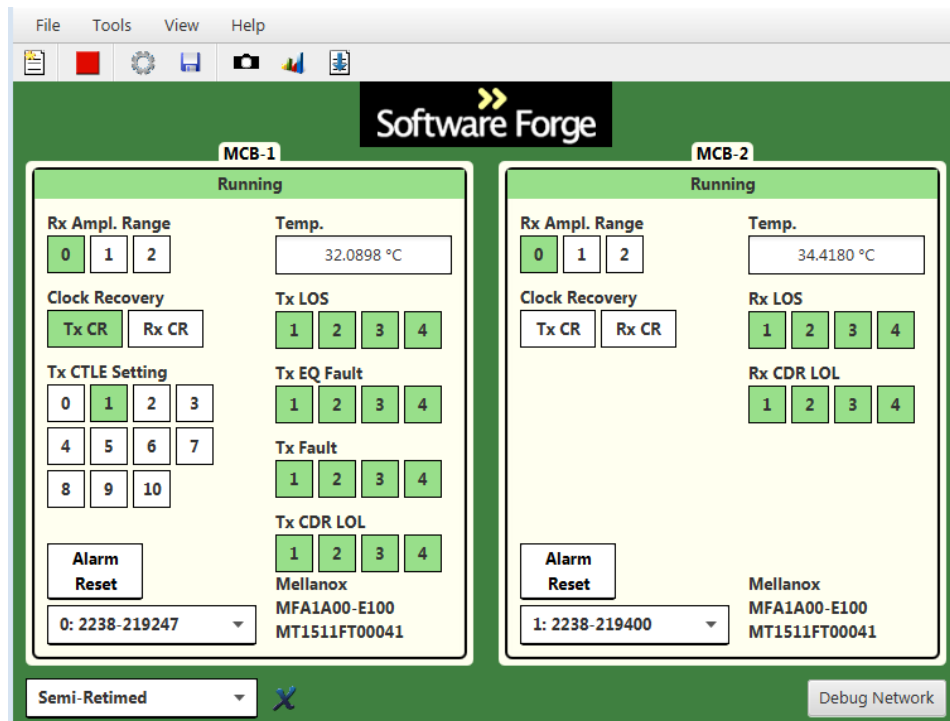

Software Forge – Vector Network Analyzer (VNA) MATLAB Application

This Application analyzes and processes the s32p VNA data so that the results are available immediately after the data is collected. This has helped reduce the data analysis time from months to minutes.
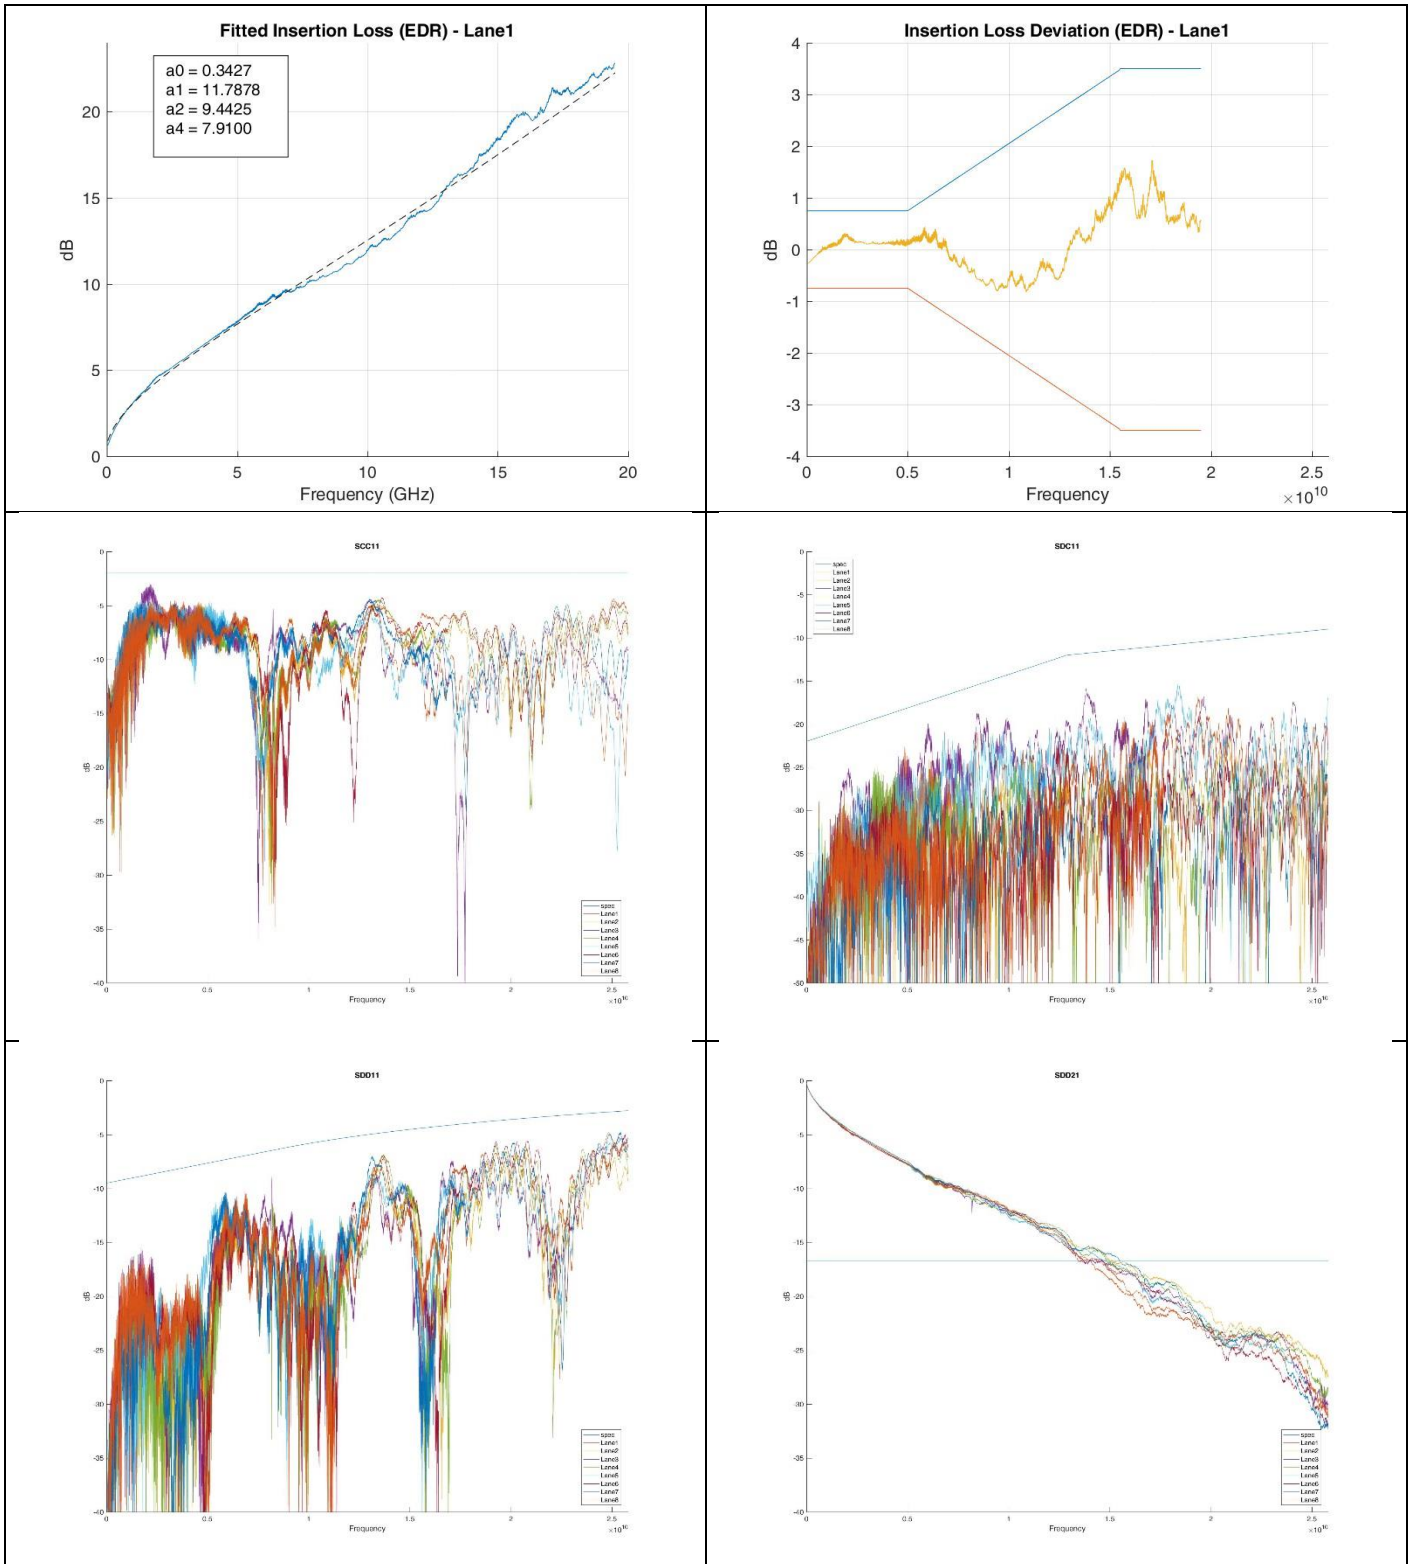

Software Forge – High Performance Computing – Performance Monitor (HPC-PM)

The High Performance Computing – Performance Monitor (HPC-PM) measures network performance of RDMA and/or TCP connections. The tool can be used for network diagnostics as well as engineering.
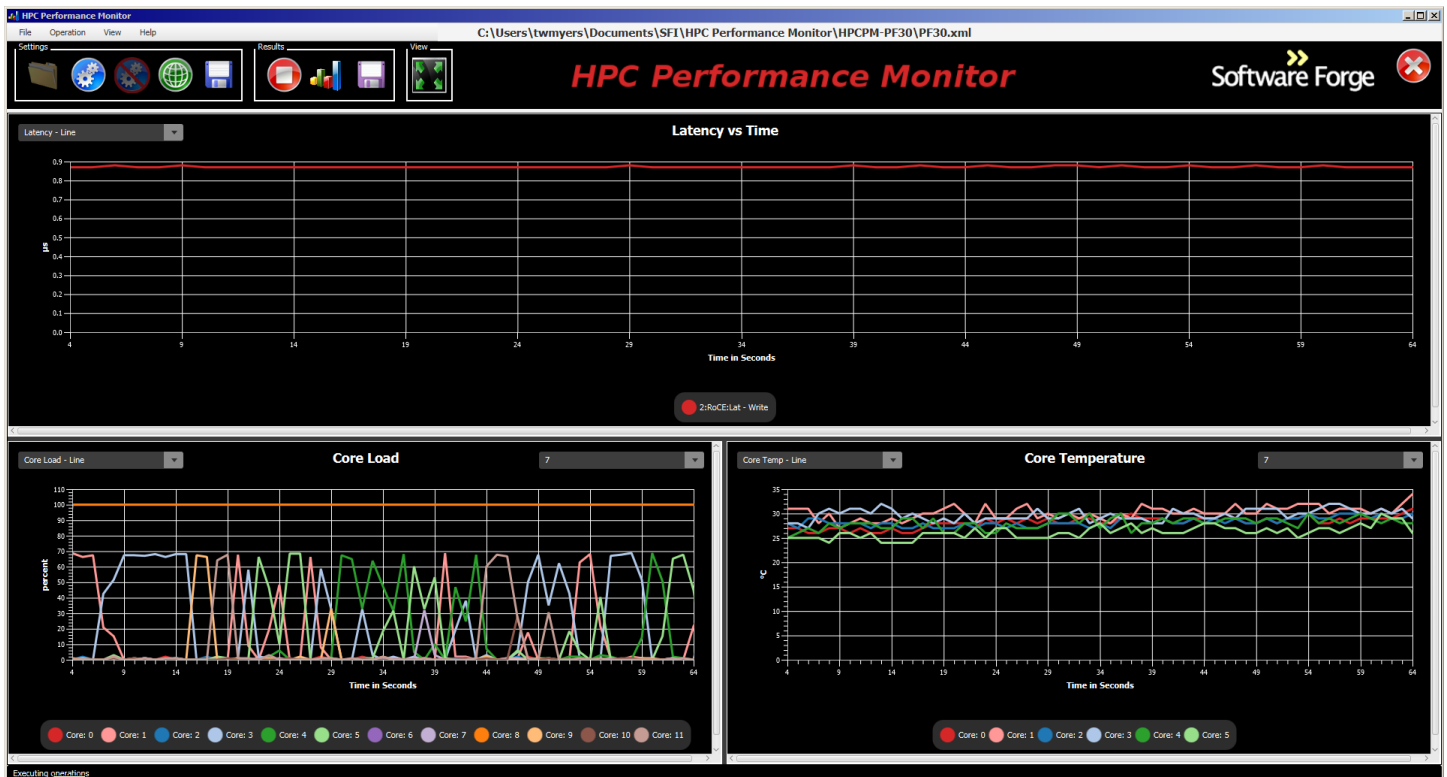

Total Phase

I2C/SPI Host Adapter Test fixture

The Aardvark I2C/SPI Host Adapter is a fast and powerful I2C bus and SPI bus host adapter through USB. It allows a developer to interface a Windows, Linux, or Mac OS X PC via USB to a downstream embedded system environment and transfer serial messages using the I2C and SPI protocols.

http://www.totalphase.com/products/aardvark-i2cspi/?gclid=CIzW2sDjg8QCFWQV7Aod3RwAvA

EEPROM Programming Kit

Total Phase has bundled together a complete set of development tools and accessories that allow developers to erase, program, and verify serial EEPROMs.

http://www.totalphase.com/catalog/product/view/id/24/s/eeprom-devkit/category/4/

IBTA Application: Used to program EEPROM cable modules when doing ATD testing and in general for reprogramming EEPROMs as needed.

Ace Unitech – Variable ISI Channel

CLE-1000-S2

Designed as a variable Inter-Symbol-Interference (ISI) channel for high speed serial interface stress tests. It controls the insertion loss continuously at 0.1% step (1,000 steps) in its dynamic range for fine adjustment. The differential transmission lines are totally passive and DC coupled. The adjusted insertion loss amount is reliably repeatable and stable for secure test results. The control is done by the volume dial on the front panel and/or PC remote via USB for automated calibration. Three (3) models of different loss range are prepared to cover various data rates. 4ch versions are also available. The CLE1000 is a convenient ISI channel, applicable for various standard stress tests and compliance tests.

IBTA Application:

- EDR Active Cable Time Domain Testing (ATD)
- Precise adjustment of frequency-dependent input channel loss.
